

Sprint 2 Report

CSE 4316

Ada Lovelace

October 20th, 2026

Sprint start date:	October 6th, 2026
Sprint end date:	October 20th, 2026
Project title:	DigitDesk Handwritten Form Digitization Service
Team name:	Team Perceptron
Partners:	Alan Turing Grace Hopper John Von Neumann Charles Babbage
Instructor:	Christopher D. McMurrough

1 Sprint Goal

Establish a digit-recognition baseline on public MNIST data and a reproducible training/evaluation harness, ahead of adapting to real sponsor forms.

2 Sprint Backlog

Planned tasks (hours).

Task description	Estimated work	Actual work
Load MNIST train/test and build data loaders	3.0	3.0
Implement CNN classifier (PyTorch)	5.0	4.5
Training + evaluation harness (reproducible)	5.0	6.0
Confidence calibration (temperature scaling)	4.0	4.5
Model versioning + dataset hashing (MS-01)	3.0	3.0
Draft field-segmentation approach	4.0	4.0
TOTAL	24.0	25.0

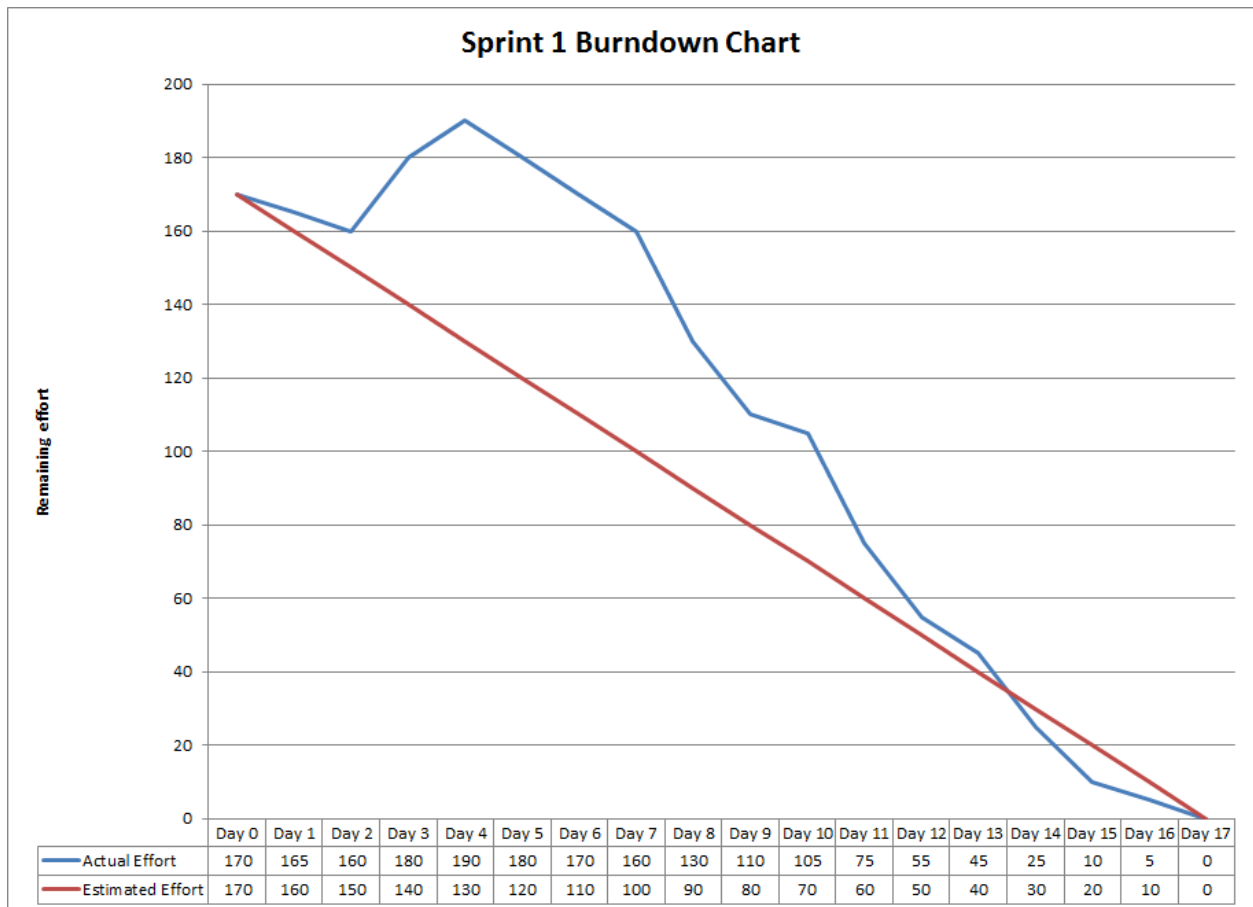

3 Individual Time Expenditures

Tasks performed by the individual (hours).

Task Description	Actual work	Percent complete
Implement CNN classifier (PyTorch)	4.5	100%
Training + evaluation harness	6.0	100%
Confidence calibration	4.5	90%
TOTAL	15.0	-

4 Team Burndown Chart

Ideal and actual daily team effort are shown below.

5 Individual Retrospective

Actions to **start** doing (top 3)

- Fix the evaluation metric and validation split before any tuning.
- Log every run's model version and dataset hash automatically.
- Reserve time for the MNIST-to-real domain gap early.

Actions to **stop** doing (top 3)

- Reporting only top-line accuracy without calibration/error analysis.
- Training in ad-hoc notebooks that are not re-runnable.
- Assuming MNIST accuracy will transfer to real forms.

Actions to **continue** doing (top 3)

- Keeping the model behind a stable, replaceable interface (QA-01).
- Pairing with John on the segmentation interface contract.
- Short daily blocker syncs.

6 Peer Review

Candid individual assessment; not shared. Each item graded 1–5.
Evaluation items:

- **Participation** - present and contributing?
- **Communication** - timely, effective updates?
- **Work quality** - claimed tasks; met objectives; added value?
- **Professionalism** - professional and collaborative?
- **Overall** - overall value this period.

Team member name	Participation	Communication	Work quality	Professionalism	Overall
Ada Lovelace	5	5	5	5	5
Alan Turing	5	5	5	5	5
Grace Hopper	5	4	4	5	4
John Von Neumann	5	4	5	5	5
Charles Babbage	4	4	4	4	4
